Subject: Upcoming Meetings Next Week - Software/Hardware Check

Vic, John, and Scott –

We are looking forward to our meetings next week to discuss the Upper Hudson River Model. I will be circulating an agenda for comment sometime this week. Currently, our modeling team (including me), will be arriving at your offices between mid-morning to early afternoon on Wednesday, July 14. We plan to begin the day around 1p, if that's ok with you all. We plan to be there until mid-day Friday.

I wanted to touch base with you guys before we get there and exchange some notes regarding computers and software. You may have noticed that some of the tools we passed to you on the hard drives last week were written in Interactive Data Language (IDL). We took a guess that you all have licenses to IDL and can run these tools – they are extremely helpful with post-processing the model results and linking the models together. Please let me know if you guys do not have IDL – we would want to discuss how best to proceed, if you don't have licenses to that software.

It may be beneficial for me to link up our techie folks with yours so we can ensure minimal "down time" related to the hard drive/computer set ups before next week. Let me know if there's someone on your end that would be good to coordinate with.

Thanks again and I'll be back in touch soon.

Best,

Jennifer
